

radura®

Chopping TECHNOLOGY

radura® straw chopper knife | High-Performance

Chopper blades are exposed to high wear that is particularly extreme on the outer ends, leaving them to round off and become dull.

- Not so **radura®** blades. On these blades the back surface is harder than the front (beaver teeth effect),
- which creates a consistently sharp mating edge.
- For a consistently high quality of chop

Standard chopper blades

Induction hardened cutting edges

Edges begin to round off due to wear

Longer service life

radura® hard-faced blades

The back surface is harder than the front

The cutting edge remains unaffected by wear

radura® straw chopper knife | High-Performance

Up to
9m spreads
without active spreader

Twisted **radura**® Paddle blades accelerate the air stream through the chopper and hence the material flow. With the cutting edges pointing to opposite directions, the straw and chaff are distributed evenly across the full swath width. Optimum results are achieved at 6.50m+ work widths.

Spreading up to 9m (30ft)

High air velocity
along the swath lines
throws the material
far and wide

- Homogeneous spreading
- Simplifies the successive soil cultivation

Replace in time

radura® PARTS

Increase your harvest success

Straw chopper knives are prone to high wear and have to be replaced regularly.

High degrees of wear cause negative impacts on the harvest success.

Example worn straw chopper knives:

- Increased fuel needs
- Insufficient fanning of the straw
- Slow rotting of the straw
- Insufficient straw distribution

radura® fits. Reliably.

radura® is multifaceted.
radura® fits.
radura® is save.

- Choose your type of blade
- Combine knives and counter knives
- Choose the complete set for your straw chopper shaft

radura® online product finder

The straw chopper knife portfolio contains all common knife types.

How it works

- **radura.info**: Choose your straw chopper knife according to machine type and tothing
- **radura.info** offers the matching counter knife or complete sets
- **radura.info** offers alternative products, e.g. High-Performance knives
